Introduction to Digital Toolkit

This module aims to help you understand the basics of the digital world and reflect on how it impacts our lives. It also encourages you to think about your role and skills in this evolving digital landscape.

The digital world is changing rapidly.

These changes not only affect our daily lives but also the needs of organizations. Many organizations now recognize the importance of being more digital, data-driven, and efficient. They need people with the right skills and mindsets.

Who is this module for?

Whether you're already familiar with the digital world or just starting to include it in your career, this module will help you:

If you are experienced

Dive into advanced concepts and sharpen your expertise, embracing the evolving nature of the digital landscape. Explore additional resources in the Wrap Up section.

If you are new to digital

Use this module as a way to explore new concepts. Identify topics that interest you and incorporate them into your personal digital learning plan.

In this module, you'll learn to:

01

Identify different digital advancements and how they impact you.

02

Develop your digital toolkit based on the knowledge and skills you want to explore.

Going digital is transforming our lives

Going digital is transforming our personal and professional lives, helping us work together better, innovate, and solve urgent problems.

Work together better

Innovate faster

Solve urgent problems

Create new opportunities

Reflection

As you watch this video, think about the most recent digital project you were part of at work or witnessed others leading. It could even be something you read about in an article or in the news.

What made it so memorable to you?
What promise for the future did it hold?
